Art Unit: 3754

124 Page 2

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1, 5, 7, 11, 15 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Finch (5,586,586). Finch discloses a portion or cartridge for a dispensing system 132, 39, 136 the fluid dispenser cartridge of Finch comprises or includes as claimed a reservoir 12, an inlet 34, an outlet 16, a fill tube 42 that includes a valve as part of dispenser 24 as disclosed on col. 4, lines 55-56, and a means for gating gas 18 that includes a pressure release valve (see claim 7) 45.
- 3. Claims 1, 5, 12, 14, 16 and 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Schuetz et al. (5,971,009). Schuetz discloses a portion or cartridge for a dispensing system 40, 50, 60 the fluid dispenser cartridge of Schuetz comprises or includes as claimed a reservoir 34, an inlet 14, an outlet as is the portion of 20 extending from the tee with 14 to fill valve 22, a fill tube 24, a means for gating gas 72, 74, and an optical sensor 86.
- 4. Claims 1, 5, 6, 12, 13, 16, 17 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Balsdon (2004/0194831). Balsdon discloses a portion or cartridge for a dispensing system that is part of an automobile apparatus that dispenses

Application/Control Number: 10/635,124

Art Unit: 3754

predetermined volumes of fluid to engine 20 the fluid dispenser cartridge of Balsdon comprises or includes as claimed a reservoir 16, an inlet 16a, an outlet that passes through 122, 110, a fill valve 14, a fill tube 32, and a means for gating gas to ambient 12a, 34.

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 2, 3, 6, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schuetz et al. (5,971,009) in view of Healy (6,554,881). Schuetz discloses a dispenser with a vent to ambient 72, 74 substantially as claimed but does not disclose the use of a polyethylene filter. However, Healy teaches the use of polyethylene filters in vents (see col. 3, lines 31-58), for the purpose of preventing the spread of contaminants. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the dispenser of Schuetz with a polyethylene filter as, for example, taught by Healy in order to prevent the spread of contaminants.
- 7. Claims 2, 4, 6, 8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schuetz et al. (5,971,009) in view of Wade (6,073,812). Schuetz discloses a dispenser with a vent to ambient 72, 74 substantially as claimed but does not disclose the use of a Teflon filter. However, Wade teaches the use of Teflon filters in dispensing vents 21, for the purpose of preventing the spread of contaminants.

Art Unit: 3754

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the dispenser of Schuetz with a Teflon filter as, for example, taught by Wade in order to prevent the spread of contaminants.

- 8. Applicant's arguments with respect to the claims have been considered but are most in view of the new ground(s) of rejection.
- 9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Casimer Jacyna whose telephone number is 571-272-4889. The examiner can normally be reached on Wed. thru Fri. 9AM-7PM, Mon. 7AM-1PM.

Art Unit: 3754

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Shaver can be reached on 571-272-4720720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
